MVCTC HVAC Student Puts His Skills to the Test

Clayton, Ohio – Miami Valley Career Technology Center (MVCTC) Heating, Ventilation, and Air Conditioning (HVAC) program senior, Josh Moody, recently created a sheet metal ball in lab. Josh, from New Lebanon, created the ball after Mr. Routzohn discussed in class that a well-trained sheet metal worker could make a ball out of sheet metal. Josh mentioned this to his fellow workers at Drake Heating & Air, one of whom then challenged Josh to make the ball. Josh asked Mr. Routzohn for permission to make the sheet metal ball as a special lab project. The ball is made out of 26-gauge sheet metal and is 10 inches in diameter. It required Josh to utilize his knowledge of parallel line layout that he had learned from Mr. Routzohn. For more information about the MVCTC HVAC program, please visit www.mvctc.com.
