MVCTC FFA Students Visit Clark State Community College

Springfield, Ohio – Miami Valley Career Technology Center (MVCTC) FFA students in Agri-Technology, Horticulture, and Ag Services programs recently visited Clark State Community College to take the Compass College Entrance Exam and to tour the campus. The students in these MVCTC programs may have the opportunity to earn up to 14 college credits to Clark State for free, by meeting the grade and class requirements while attending MVCTC.

During the 2009-2010 school year, MVCTC will be introducing the Center Of Science in Agriculture (COSA). COSA will allow students to experience all potential career areas of agriculture in the junior year curriculum (Animal Science, Business Operations, Plant Science, Engineering, Environmental Science, and Food Science). Then the senior year gives students an opportunity to specialize in a senior year COSA program (Veterinary Science, Animal Science Management, Ag Resources Management, Plant Science, Power Technologies, Environmental Engineering, and Food Science). COSA opens many doors to college opportunities and prepares students for a professional career. For more information about COSA, please visit www.mvctc.com/COSA.
