Former Governor Taft Discusses Politics with MVCTC Students

Clayton, Ohio -- Miami Valley Career Technology Center (MVCTC) Social Studies instructor, Justin Adams, organized former Governor Bob Taft's visit to the MVCTC campus on October 13, 2011 to address students on governmental issues. Students from government classes taught by Justin Adams, Eric Dolan, Dave Gilmore, and Brian Welch attended the panel discussion. The presentation centered on topics students were learning in their government class. Former Governor Taft led an interactive discussion where he asked students questions about various topics in government, as well as current events. Students were engaged in this dynamic presentation. The tables were turned as the discussion ended with a panel of students asking Mr. Taft questions about healthcare reform, immigration, education policies, and issues facing voters on November 8, 2011.
