MVCTC Alumnus, Alex Baldukas Success Story

MVCTC Alumnus, Alex Baldukas, was recently highlighted in the Chaminade Julianne High School "Vision" Spring 2012 publication. For the past five years, Alex has volunteered at the non-profit "Access Project" that repairs and recycles electronic equipment. The agency also educates and trains people with challenges. Alex will be working this summer training high school students at Access Project. Way to go Alex!

Are you a MCJVS/MVCTC alumni with a story to share? Feel free to post your story on the Facebook page or e-mail it to kherzog@mvctc.com. We would love to hear from you.

Alex Baldukas '06 Exciting advances are being made in technology each year. This rapid change in technology means that people are upgrading and outgrowing their computers, gaming equipment, music players and phones at a faster rate. That's where Access Project steps in.

For the past five years I have volunteered my time at this non-profit organization that repairs, demanufactures and recycles electronic equipment. My job at is to take apart low-end or donated items to reuse as parts for other components. We recycle and reuse unwanted electric equipment in safe and responsible ways that are compatible with EPA Universal Waste Rules. (We also take VCRs, ink and ink toners cartridges, washers and dishwashers, and much more!)

In addition to providing the community with a much-needed service, Access Project educates and trains people with challenges to become members of the general workforce. I'm thrilled to be personally involved with training high school students to do this job in the summer. This job is very rewarding for me because I get to know many people and I know that what I do is helping our environment.

As you upgrade your own electronic equipment, keep us in mind as a "green" place to take your discards. Access Project is located on Salem Avenue in Trotwood and is open Monday through Friday and on Saturdays until noon. More information can be found on our Web site: accessproject.us. Giving Access Project your old items will help the environment and our workers. As we say, "Computers can be written off, people can't."
