Local Company Partners with MVCTC Precision Machining Program

Clayton, Ohio – Reynolds Machinery, Inc., a local machining company located in West Carrollton, is partnering with the Miami Valley Career Technology Center (MVCTC) Precision Machining program to help develop a highly skilled workforce in the Miami Valley Region. Reynolds Machinery, Inc. recently leased a CNC Lathe to MVCTC for a dollar a year. MVCTC has several Precision Machining graduates working for Reynolds, the hope is that the partnership will encourage more young people to consider a career in machining. Reynolds Machinery sees the value of the education MVCTC students receive in the Precision Machining program and hopes to hire more graduates from the program.

Reynolds employee, Tyler Murphy, who set up the new machine, is a former MVCTC precision machining student from Valley View. After setting up the lathe, he provided a demonstration in operating the machine, and spoke to current students about the careers available at Reynolds, as well as his experience working for the company.

For more information about MVCTC, please visit www.mvctc.com.

For over 40-years, MVCTC has been providing career technical education for 27 partner school districts encompassing five counties, including Darke, Miami, Montgomery, Preble, and Warren Counties. MVCTC is dedicated to providing in-demand workforce training for youth, adults, and organizations in the Miami Valley.
